3. Local Service

A

- **A bus that travels through once and hour and stops at fixed stops.**
- Route travels on a preset path on a regular schedule
- Buses come frequently, usually hourly in low-density areas
- Often requires a bus transfer to leave neighborhood

B

- **A service requested by phone to come in 20 min.**
- Passenger requests a ride through an app
- Can only be used within the neighborhood
- This ride may be shared with others to consolidate nearby trips

VS

+ **Fixed routes create a reliable system**
+ **Many people can rely on the same service**

- **Fixed routes only come once an hour**
- **There are still places too far to walk**

+ **Transit can provide door-to-door service**
+ **Service can fill gaps and take people to stations**

- **Routes only activated when requested**
- **Can only help small numbers of people**
- **Less efficient and more expensive**
